

Senior Project Manager (m/f/d) Aviation

Hamburg

Reference Number: 017093

Your tasks:

- You manage our projects in the production and IT environment using classical or agile project methods
- You are responsible for the requirements management, risk and change management
- You control the project progress and proactively remove obstacles
- You lead meetings with stakeholders and support them in meeting the project objectives
- In addition, you are the contact person for all stakeholders

Your profile:

- You have successfully completed a degree in mechanical engineering, (industrial) engineering, production engineering or a similar subject area
- You have at least three years of professional experience in waterfall projects or agile project management
- You have acquired a certification for PRINCE2 / IPMA or SCRUM / PSM / SAFe
- Ideally you can show experience in aviation, automotive or related industries
- Very good German and English skills round off your profile
